This form is to be completed for any of the following finishes and colors:
-01, -90, -G, any Solid Color (all manufacturers), and any Formica 180FX Colors.

Shad's Custom Countertops, Inc. manufactures countertops using all of the major companies' material including Formica, Wilsonart, Arborite, Pionite, Nevamar and others. They design their line to accommodate a wide range of markets and continue to manufacture laminate in solids, high-gloss finishes and non-repeating patterns.

Solid colors are more dramatic and add contrast, they always show scratches and wear immediately and are not recommended for kitchen countertop applications.

Gloss finishes are appropriate for bathroom vanity countertop applications only. Although this finish is extremely popular for kitchen countertops... in more active areas such as kitchens, it is not recommended as scratches, fingerprints, etc. are highly visible.

It is our opinion, based on years of manufacturing countertops that these laminates are very difficult to fabricate without minimal scratches or defects.

Formica has recently released a new line called 180FX. This laminate is manufactured to replicate the natural look of granite. In doing so, the pattern for the laminate does not repeat throughout a sheet as other laminates do. We want to inform you that when ordering laminate countertops with seams (Miters, Butt Joints, Laminate Seams, etc.), the pattern will not match and will vary from piece to piece.

We strongly recommend that our clients and their customers are aware of the nature of these products, prior to ordering their countertops. By completing this form it waives Shad's Custom Countertops, Inc. of responsibility for such occurrences.

Waiver

I/We, the undersigned, understand that solid and high-gloss finishes will show scratches and limitations of the product. Non-repeating pattern laminate will not match if there are seams. These manufacturing limitations are beyond the control of Shad's Custom Countertops, Inc. There will be no claims or adjustments made or accepted.
